Page 2 of 274

For a better experience of my E-Book: A few instructions and tips on how to use it (READ ME!)

I'm aware that for some of you this may be the first E-Book you buy or bought so here I would like to give you a few instructions on how to get the best out of it.

Printing the book

If you want you can print this book on paper. However I would not recommend you to do so. First because of the number of pages (choose a two pages per page layout if you do print it) and second because of the updates you're getting. If you want to print it make sure you only print the new chapters when getting an update, don't reprint the entire book every time.

I would recommend you to print out the contents table of the E-Book on paper and keep it on your desk. It makes it much easier and faster for you to know what is included in the E-Book and find something you're looking for. Even faster if you just read the main titles first when looking for something. Download a two pages per page version of the contents-index for print by [clicking here](#).

Reading the book on your computer

To me the best application to read an E-Book on your (Mac) computer is Preview. Not Acrobat Reader. I find Preview much cleaner and graphically better. If your computer opens it in Acrobat select it, hit ctrl+click choose Get Info, or hit Cmd+i, Open with: Preview. If you want all your PDF to open in Preview also hit Change All...

The titles and the page numbers of the index you find at the beginning of this E-Book are clickable. Once you click on a title you're automatically taken to the page of interest. If you're reading the book in Preview or any other application you can also search the content hitting Command (Cmd or Apple on older machines) and F. For example Cmd+F Tables.

- E-Book internal links are always [green](#), external links opening in a browser are always [blue](#)
- In HTML codes posted in this E-Book the parts you have to edit (or can edit if you want) are written in [red](#). You shouldn't have to mind about the other parts.
- Copy & paste from this book doesn't maintain the formatting. Hence near some HTML codes you will find an orange [Download source code](#) link. Hit them to download a .txt file containing the code where the formatting is maintained. Open the files with [TextWrangler](#) (freeware): Select the file, ctrl+click on it, choose open with, TextWrangler. This should make it easier for you to edit the codes.

The reason I tell you to use TextWrangler is that other text editors (Word, TextEdit, ...) may add their own formatting to the codes messing them up and causing them not to work properly anymore. So please download and use TextWrangler.

- At the bottom of each page you find a green "Go back to the Index" link. If you click on it you will be sent right back to the content table at the top of this E-Book for you to find what you're looking for.

[Go back to the Index](#)

<http://rapidweaverfaq.org> is made by Cédric Giger and hosted by [HostExcellence](#) //// For questions and feedback please refer to my [Forum](#). Thank you.

• The book is divided in ten sections which should make it easier for you to find what you're looking for. I would recommend you to have a look at the section pages since they tell you what other chapters from other sections you may be interested in too. Basically it helps you to get more ideas.

Reading the book on an iOS device (iPhone, iPad, iPod Touch)

To read a book on an iPhone, iPod Touch or iPad make sure you have the [iBooks](#) app installed on your device. Simply drag&drop the book into Books on iTunes. When syncing your device in iTunes make sure you choose to sync Books. On your device open iBooks, go to PDFs and choose the book you would like to read. All internal and external links also work in the iBooks app (Table of contents too).

How do updates work? How do I know if there's a newer version?

At the top of each page of my website you will find the current version of the E-Book. If you see that there is a newer version of the book than the one you currently have go to the [contact page](#) and fill in the *Automatic Update or Fresh Download Link Request* form. You will then get an e-mail with a link for you to download the latest version of the book. Should you experience any trouble please use the form you find at the bottom of that page and I will get back to you as soon as possible. Whenever a new version is published you will find an announcement on the [RapidWeaverFAQ.org Facebook page](#). All the news are found at the bottom of [this page](#).

What if i run into a problem?

Please make sure you follow the instructions. If something doesn't work it usually is because people didn't follow the instructions. If you followed the instructions but still something is not working feel free to [contact me](#). If you find any link in this E-Book which is not working as it is supposed to please [let me know](#). Since the web is constantly evolving it may from time to time happen that something is outdated in this E-Book (like when Google changes the way they manage sitemaps, ...) if you stumble into such problems please [notify me](#) for me to update that part of the book. Thanks!

Chapters to read

Since I often refer to them in this E-Book you should have a look at the following chapters before you start:

- [Basic web knowledge base](#) especially the part about [What is the root of a server/website? How do I upload a file which is not added directly to RapidWeaver? What will its URL be?](#)
- [Basic HTML Codes knowledge base](#) to get a general idea on how codes work and how to use them

RapidWeaverFAQ.org E-Book Index

Foreword	14
Section 1: Introductory chapters	15
<i>How can I entirely develop a website in local (on my computer) without having to upload anything to the web?</i>	16
Basic web knowledge base *	17
<i>What do I need to build and have a website?</i>	17
<i>What is a URL?</i>	17
<i>What is a domain?</i>	17
<i>What is a registrar?</i>	17
<i>What is a server?</i>	17
<i>What is a hosting?</i>	18
<i>What is an FTP application?</i>	18
<i>What is a Browser?</i>	18
<i>Example of FTP, Server, Hosting, Domain, Registrar, Browser</i>	18
<i>What is the root of a server/website? How do I upload a file which is not added directly to RapidWeaver? What will its URL be? (images, .mp3 files, flash files, .html files, .zip files or any other file...) (READ ME!)</i>	18
<i>Absolute paths and relative paths (or links)</i>	19
Basic HTML Codes knowledge base (READ ME!)	22
<i>Main elements and CSS styling basics</i>	22
<i>More about stylings</i>	23
<i>More about codes</i>	26
<i>Positioning, restraining, adding captions to images or else and more...</i>	28
<i>Rounded corners in HTML/CSS3</i>	30
<i>What you have to pay attention to when working with codes</i>	30
Combining codes (READ ME!)	31
General tips on building a website	34
<i>Before you start</i>	34
<i>Notes about the navigation</i>	34
<i>How to make your website be successful. Get visitors.</i>	34
<i>Making money with a website. Advertising. And: Do not overload!</i>	35
<i>Things to keep in mind</i>	36
Hosting and FTP applications	38
<i>Which is the best hosting and what server should I use?</i>	38
<i>How an FTP application works (basic)</i>	40

Introduction to RapidWeaver (READ ME!) *	43
<i>What is RapidWeaver?</i>	43
<i>Important settings in RapidWeaver</i>	43
<i>Useful in RapidWeaver</i>	44
<i>How to format text in RapidWeaver</i>	44
<i>Headings</i>	46
<i>How to add HTML Codes in RapidWeaver</i>	46
<i>How to eliminate the sidebar in RapidWeaver</i>	46
<i>How to add some code to the sidebar in RapidWeaver</i>	47
<i>How to apply the same footer to all your pages in RapidWeaver</i>	47
<i>What does the URL of a RapidWeaver page look like and why? How can I change the title displaying in the browser?</i>	48
<i>More general tips on using RapidWeaver</i>	48
Publishing	49
<i>Publishing to a server</i>	49
<i>Publishing on local</i>	49
Known issues and general troubleshoot	50
<i>The changes I made don't display on the web when published</i>	50
<i>I added some HTML Code to my page but it doesn't work when published</i>	50
Backup and retrieve a website	51
<i>How can I backup my website?</i>	51
<i>How can I retrieve a website from a backup?</i>	51
<i>My website is still published on the web but I have no RWSW file and no backup of it. How can I get it back into RapidWeaver?</i>	52
Transfer a website to another computer	53
Working on two computers	54
Multiple websites	57
<i>Managing and editing multiple websites</i>	57
<i>Publishing to the same server and domain</i>	57
<i>Publishing to different servers and/or different domains</i>	58
<i>Useful projects tricks</i>	58
<i>Two out of one (split) and one out of two (merge) projects</i>	58
Section 2: Appearance	59
Background	60
<i>Setting the background</i>	60
<i>Having a background-image adapting to the window-size and making it static</i>	61

[Go back to the Index](#)

Background slideshow	62
<i>Basic installation instructions</i>	62
<i>How can I have different slideshows on different pages?</i>	63
<i>How can I increase the number of images in the slideshow?</i>	63
<i>How can I decrease the number of images in the slideshow?</i>	65
<i>How can I increase/decrease the size of the text? Change the font?</i>	66
<i>If you find your link or font-formatting messed up after you added the slideshow...</i>	66
Empty blank page	67
<i>Using a theme</i>	67
<i>Building a page with codes</i>	67
Themes	68
Columns *	69
Tables	71
<i>Standard tables</i>	71
<i>Sortable tables</i>	73
Section 3: Navigation	74
Drop down menu	75
<i>How to add drop down menus to RapidWeaver</i>	75
<i>Troubleshoot</i>	77
<i>How to have multiple menus on a site</i>	78
<i>How to customize the appearance of the drop down menu (Basics) *</i>	78
Tear down menu	81
<i>How to add tear down menus to RapidWeaver</i>	81
Sliding image menu *	83
Accordion menu *	90
Image map	92
Rollover buttons or images	97
<i>Rollover buttons or images with fade effect</i>	97
<i>How to have multiple rollover buttons on the same page</i>	99
Floating menu (or float anything else) *	100
Redirect	102
<i>Instant redirect</i>	102
<i>Redirect with time delay</i>	102
Anchors	103

What is an Anchor?	103
How to add Anchors in RapidWeaver	103
How can I add "Back to the top" links in RapidWeaver?	104
Linking to a specific part of the page from another page	105
Section 4: Text and other content	106
Custom fonts (Google)	107
Wrap text around objects *	109
iFrame and "Frames" (Boxes with scrollbars)	110
Creating the page which will display in the iFrame (if needed)	110
iFrame	110
iFrame a particular part of a page	111
Making the iFrame clickable	111
One iFrame and multiple pages loading in it	112
How to have a TextBox with scrollbars without using an iFrame	112
Auto-Scrolling text and photos *	114
Auto-Fading text *	115
Different tabs with slide effect *	118
How do I add more tabs or reduce the number of tabs?	119
How can I have the tabs displaying vertically instead of horizontally at the top?	120
Mixed contents slideshow *	121
Toggle, Hide/Display	123
Simple Hide/Display	123
Multiple Hide/Display displaying only one at a time	124
Further notes	126
Pop up windows	127
Creating the page which will display in the popup window	127
How to have image popups	127
Code to open the popup window	128
Calendars *	130
Using iCal with PHP iCalendar	130
Using Google calendar	131
Using Google calendar with iCal (with or without an iOS Device) (Best solution!)	133
Google Maps	134

Section 5: Photos and images	136
Highslide JS (visual Highslide Editor)	137
A general way (working for all Highslide effects) *	137
Shadowbox	141
SimpleViewer galleries	146
Auto-Fading photos slideshow *	147
Having the photos change manually	149
How can I change the color displaying when the page loads?	151
How do I prevent the slideshow from stopping on mouseover?	151
Zoomify	152
Simple scroll image gallery	153
Mouseover photo album	154
CoverFlow and Cover Flow slideshow	156
CoverFlow slideshow *	157
Display random photos, text or links (or anything else) *	160
Random with refresh button	161
Section 6: Music and audio	163
Music and audio	164
General introduction	164
How to get the music online	164
HTML5 Audio Player with Playlist (Best!)	165
Using simple HTML5	168
JPlayer HTML5	168
Converting .mp3 to .m4a and .ogg	169
Using MyFlashFetish	169
Using a simple Flash player	170
Using FlashSkins.co.uk	170
The best Flash based music players	170
Note about compilations	171
How to insert a Flashplayer into a page	171
How to have the music playing on all pages	171
Sound on mouseover or on click	172
How can I have multiple sounds playing on a page?	172

Section 7: Video	174
Movies and Flash content	175
General introduction	175
Storing video and Flash files on your server	175
WMV	176
QuickTime	176
FLV	176
SWF	177
Real	177
Flash video player	177
If the movie results to be in a wrong shape	179
Embedding videos with HTML5 (Recommended!)	180
How it would work	180
How it really works	181
Currently the best solution	182
How to convert the videos to the needed formats	182
YouTube videos	183
Adding multiple YouTube videos playing in the same area with a menu to choose which video to play	183
Section 8: Files	184
Files and downloads	185
How to offer Downloads in general (works for any file type and any kind of page)	185
About PDF files	186
About Microsoft Office files	186
Using RapidWeaver's download page	186
Google Docs	187
Section 9: Social networks and interactivity	188
Social networks (A): General introduction	189
Why you should have a look at social networks and what they are good for	189
The importance of Facebook for business	189
Social networks (B): Tell a friend (ShareThis, AddToAny) and StumbleUpon	191
Tell a friend	191
StumbleUpon	192
Social networks (C): Facebook and Twitter	193
