

WordPressFAQ.org E-Book

How to easily get more out of WordPress

Presented by Cédric Giger

For a better experience of my E-Book: A few instructions and tips on how to use it (READ ME!)

I'm aware that for some of you this may be the first E-Book you buy or bought so here I would like to give you a few instructions on how to get the best out of it.

Printing the book

If you want you can print this book on paper. However I would not recommend you to do so. First because of the number of pages (choose a two pages per page layout if you do print it) and second because of the updates you're getting. If you want to print it make sure you only print the new chapters when getting an update, don't reprint the entire book every time.

I would recommend you to print out the contents table of the E-Book on paper and keep it on your desk. It makes it much easier and faster for you to know what is included in the E-Book and find something you're looking for. Even faster if you just read the main titles first when looking for something. Download a two pages per page version of the contents-index for print by [clicking here](#).

Reading the book on your computer

If you're on a Mac to me the best application to read an E-Book is Preview. Not Acrobat Reader. I find Preview much cleaner and graphically better. If your computer opens it in Acrobat select it, hit ctrl+click choose Get Info, or hit Cmd+i, Open with: Preview. If you want all your PDF to open in Preview also hit Change All... Of course you can also use Acrobat Reader or any other PDF reader application.

The titles and the page numbers of the index you find at the beginning of this E-Book are clickable. Once you click on a title you're automatically taken to the page of interest. If you're reading the book in Preview or any other application you can also search the content hitting Command (Cmd or Apple on older machines) and F. For example Cmd+F Tables.

- E-Book internal links are always **green**, external links opening in a browser are always **blue**
- In HTML codes posted in this E-Book the parts you have to edit (or can edit if you want) are written in **red**. You shouldn't have to mind about the other parts.
- Copy & paste from this book doesn't maintain the formatting. Near some HTML codes you will find an orange [Download source code](#) link. Hit them to download a .txt file containing the code where the formatting is maintained. Open the files with [TextWrangler](#) (Mac): Select the file, ctrl+click on it, choose open with, TextWrangler. Or [Notepad](#) (Win). This should make it easier for you to edit the codes.

The reason I tell you to use TextWrangler or Notepad is that other text editors (Word, TextEdit, ...) may add their own formatting to the codes messing them up and causing them not to work properly anymore. So please download and use TextWrangler or Notepad.

- At the bottom of each page you find a green “Go back to the Index” link. If you click on it you will be sent right back to the content list at the top of this E-Book. On some FAQs I linked to from other FAQs I added a “*What links here?*” part at the end of them for you to easily find your way back to the FAQ you were reading before. This means that you don’t have to scroll all the way through the book to find what you’re looking for and should make it easier for you to read the book.
- The book is divided in ten sections which should make it easier for you to find what you’re looking for. I would recommend you to have a look at the section pages since they tell you what other chapters from other sections you may be interested in too. Basically it helps you to get more ideas.

Reading the book on an iOS device (iPhone, iPad, iPod Touch)

To read a book on an iPhone, iPod Touch or iPad make sure you have the [iBooks](#) app installed on your device. Simply drag&drop the book into Books on iTunes. When syncing your device in iTunes make sure you choose to sync Books. On your device open iBooks, go to PDFs and choose the book you would like to read. All internal and external links also work in the iBooks app (Table of contents too).

How do updates work?

You will get an e-mail with a download link for you to download the latest version of the E-Book. Just delete the old version once you downloaded the new one. If [checking the website](#) you see there’s a newer version than the one you have but didn’t get the e-mail with the update link go to [this page](#) provide the e-mail address you used to buy the book and an alternative e-mail address and tell me you didn’t get the update. There may always be some technical issues.

What if i run into a problem?

Please make sure you follow the instructions. If something doesn’t work it usually is because people didn’t follow the instructions. If you followed the instructions but still something is not working feel free to [contact me](#). If you find any link in this E-Book which is not working as it is supposed to please [let me know](#). Since the web is constantly evolving it may from time to time happen that something is outdated in this E-Book (like when Google changes the way they manage sitemaps, ...) if you stumble into such problems please [notify me](#) for me to update that part of the book. Thanks!

Because I often refer to them in this E-Book you should have a look at the following chapters: [What is the root of a server/website? How do I upload a file which is not added directly to WordPress? What will its URL be?](#) and [How to add HTML Codes in WordPress \(READ ME!\)](#) which are both very important.

WordpressFAQ.org E-Book Index

| | |
|--|-----------|
| Foreword | 14 |
| Section 1: Introductory chapters | 15 |
| Basic web knowledge base * | 16 |
| <i>What is a URL?</i> | 16 |
| <i>What is a domain?</i> | 16 |
| <i>What is a registrar?</i> | 16 |
| <i>What is a server?</i> | 16 |
| <i>What is a hosting?</i> | 16 |
| <i>What is an FTP application?</i> | 16 |
| <i>What is a Browser?</i> | 17 |
| <i>Example of FTP, Server, Hosting, Domain, Registrar, Browser</i> | 17 |
| <i>What is the root of a server/website? How do I upload a file which is not added directly to WordPress? What will its URL be? (images, .mp3 files, flash files, .html files, .zip files or any other file...) (READ ME!)</i> | 17 |
| <i>Absolute paths and relative paths (or links)</i> | 18 |
| Basic HTML Code knowledge base * | 20 |
| <i>Images</i> | 20 |
| <i>How to make links and image-links</i> | 20 |
| <i>How to customize the appearance of links</i> | 21 |
| <i>Stylings for fonts and text formatting</i> | 22 |
| <i>Stylings for borders</i> | 24 |
| <i>Stylings for backgrounds</i> | 25 |
| <i>Classes for stylings</i> | 25 |
| <i>Special-characters and punctuation in codes</i> | 27 |
| <i>Line-break tag</i> | 28 |
| <i>Color-codes and designations</i> | 28 |
| <i>How to customize the appearance of iFrames</i> | 28 |
| <i>Position of divs</i> | 29 |
| <i>Adding captions to images in HTML</i> | 30 |
| <i>Note about combining various codes of different tutorials you find in this E-Book and about how to write content in HTML to be used in codes (READ ME!)</i> | 30 |
