

iWebFAQ.org E-Book

How to easily get more out of iWeb

Presented by Cédric Giger

iWebFAQ.org E-book (v.2.3)

© 2009-12 by Cédric Giger

Page 2 of 363

For a better experience of my E-Book: A few instructions and tips on how to use it (READ ME!)

I'm aware that for some of you this may be the first E-Book you buy or bought so here I would like to give you a few instructions on how to get the best out of it.

Printing the book

If you want you can print this book on paper. However I would not recommend you to do so. First because of the number of pages (choose a two pages per page layout if you do print it) and second because of the updates you're getting. If you want to print it make sure you only print the new chapters when getting an update, don't reprint the entire book every time.

I would recommend you to print out the contents table of the E-Book on paper and keep it on your desk. It makes it much easier and faster for you to know what is included in the E-Book and find something you're looking for. Even faster if you just read the main titles first when looking for something. Download a two pages per page version of the contents-index for print by [clicking here](#).

Reading the book on your computer

To me the best application to read an E-Book on your (Mac) computer is Preview. Not Acrobat Reader. I find Preview much cleaner and graphically better. If your computer opens it in Acrobat select it, hit ctrl+click choose Get Info, or hit Cmd+i, Open with: Preview. If you want all your PDF to open in Preview also hit Change All...

The titles and the page numbers of the index you find at the beginning of this E-Book are clickable. Once you click on a title you're automatically taken to the page of interest. If you're reading the book in Preview or any other application you can also search the content hitting Command (Cmd or Apple on older machines) and F. For example Cmd+F Tables.

- E-Book internal links are always **green**, external links opening in a browser are always **blue**
- In HTML codes posted in this E-Book the parts you have to edit (or can edit if you want) are written in **red**. Normally you shouldn't have to mind about the other parts.
- Copy & paste from this book doesn't maintain the formatting. Hence near some HTML codes you will find an orange **Download source code** link. Hit them to download a .txt file containing the code where the formatting is maintained. Open the files with [TextWrangler](#) (Free): Select the file, ctrl+click on it, choose open with, TextWrangler. This should make it easier for you to edit the codes.

The reason I tell you to use TextWrangler is that other text editors (Word, TextEdit, ...) may add their own formatting to the codes messing them up and causing them not to work properly anymore. So please download and use [TextWrangler](#) (Free).

- At the bottom of each page you find a green "Go back to the Index" link. If you click on it you will be sent right back to the content table at the top of this E-Book for you to find what you're looking for.

[Go back to the Index](#)

<http://iwebfaq.org> is made by Cédric and hosted by [HostExcellence](#) //////////////// For questions and feedback about this E-Book please refer to my [Forum](#). Thank you.

• The book is divided into ten sections which should make it easier for you to find what you're looking for. I would recommend you to have a look at the section pages as well since they tell you what other chapters from other sections you may be interested in too. Basically it helps you to get more ideas.

Reading the book on an iOS device (iPhone, iPad, iPod Touch)

To read a book on an iPhone, iPod Touch or iPad make sure you have the [iBooks](#) app installed on your device. Simply drag&drop the book into Books on iTunes. When syncing your device in iTunes make sure you choose to sync Books. On your device open iBooks, go to PDFs and choose the book you would like to read. All internal and external links also work in the iBooks app (Table of contents too).

How do updates work? How do I know if there's a newer version?

If checking the E-Book's [product page](#) you see that there is a newer version of the book than the one you have go to the [contact page](#) and fill in the *Automatic Update or Fresh Download Link Request* form. You will then get an e-mail with a link for you to download the latest version of the book. Should you experience any trouble please use the form you find at the bottom of that page and I will get back to you as soon as possible. Whenever a new version is published you will find an announcement on the [iWebFAQ.org Facebook page](#).

What if I run into a problem?

Please make sure you follow the instructions. If something doesn't work it usually is because people didn't follow the instructions. Most common example: if you use HTML Snippets where I'm telling you to use Alternative HTML it most probably won't work the way it should. If you followed the instructions but still something is not working feel free to [contact me](#). If you find any link in this E-Book which is not working as it is supposed to please [let me know](#). Since the web is constantly evolving it may from time to time happen that something is outdated in this E-Book (like when Google changes the way they manage sitemaps, ...) if you stumble into such problems please [notify me](#) for me to update that part of the book. Thanks!

Because I often refer to them in this E-Book you should have a look at the following chapters: [What is the root of a server/website? How do I upload a file which is not added directly to iWeb? What will its URL be?](#) and [Alternative HTML](#).

The codes you find in this E-Book were written to work once published to the web. If you want to use them on local (on your computer) please read [Absolute paths and relative paths \(or links\)](#) especially the part with an **orange** border around it.

iWebFAQ.org E-Book Index

Foreword	15
<i>Note for MobileMe users</i>	16
Section 1: Introductory chapters	17
Basic web knowledge base (READ ME!)	18
<i>What do I need to build and have a website?</i>	18
<i>What is a URL?</i>	18
<i>What is a domain?</i>	18
<i>What is a registrar?</i>	18
<i>What is a server?</i>	18
<i>What is a hosting?</i>	19
<i>What is an FTP application?</i>	19
<i>What is a Browser?</i>	19
<i>Example of FTP, Server, Hosting, Domain, Registrar, Browser</i>	19
<i>What is the root of a server/website? How do I upload a file which is not added directly to iWeb? What will its URL be? (images, .mp3 files, flash files, .html files, .zip files or any other file...) (READ ME!)</i>	19
<i>Absolute paths and relative paths (or links)</i>	20
Basic HTML Codes knowledge base (READ ME!)	23
<i>Main elements and CSS styling basics</i>	23
<i>More about stylings</i>	24
<i>More about codes</i>	27
<i>Positioning, restraining, adding captions to images or else and more...</i>	29
<i>What you have to pay attention to when working with codes</i>	31
Combining codes (READ ME!)	32
General tips on building a website	35
<i>Before you start</i>	35
<i>Notes about the navigation</i>	35
<i>How to make your website be successful. Get visitors.</i>	36
<i>Making money with a website. Advertising. And: Do not overload!</i>	37
<i>Things to keep in mind</i>	38
Introduction to iWeb (READ ME!)	40
<i>General introduction</i>	40
<i>A tip on adding images</i>	40
<i>How to add something to the Footer</i>	40

[Go back to the Index](#)

<http://iwebfaq.org> is made by Cédric and hosted by [HostExcellence](#) //////////////// For questions and feedback about this E-Book please refer to my [Forum](#). Thank you.

<i>How to make a link in iWeb</i>	41
<i>How to delete a website from iWeb or from the web</i>	41
<i>How to preview a page</i>	41
<i>How do I define what displays as the header at the top of the browser window?</i>	41
<i>What does the URL of an iWeb website-page look like and why?</i>	42
<i>I don't like to have the sitename folder displaying in my URL. How can I get rid of it? How can I shorten my URL?</i>	43
<i>Show Layout and what it is good for</i>	44
<i>Changing the language of the application</i>	44
<i>Using iWeb for simple graphic work</i>	44
Utilities	45
Known issues and general troubleshoot	47
Backup and retrieve a website	48
<i>How can I backup my website?</i>	48
<i>I lost my website, it doesn't show up in iWeb anymore. How can I retrieve my website?</i>	49
<i>My website is still published on the web but I have no Domain file. How can I get it back into iWeb?</i>	49
Transfer a website to another computer	51
Working on two computers	52
Publishing and hosting	55
<i>MobileMe</i>	55
<i>Notes about publishing to a server other than MobileMe</i>	55
<i>How to publish to a server using iWeb's integrated FTP</i>	55
<i>How to publish to a folder and why you should think of doing that</i>	57
<i>How an FTP application works (basic)</i>	59
<i>How to avoid uploading each time the whole website when publishing to a folder</i>	61
<i>Which is the best hosting and what server should I use?</i>	67
Personal domains	69
<i>What is a personal domain?</i>	69
<i>How do the different settings work?</i>	69
<i>Where to get a domain and how much it costs</i>	70
<i>Personal Domains yourdomain.com and personal e-mails whatever@yourdomain.com</i>	70
HTML Snippets and Widgets	72
<i>What is an HTML Snippet and how do I add one to my page?</i>	72
<i>The problems using HTML Snippets</i>	72
<i>What is a widget and how do they work?</i>	73
Alternative HTML	74

[Go back to the Index](#)

<http://iwebfaq.org> is made by Cédric and hosted by [HostExcellence](#) // For questions and feedback about this E-Book please refer to my [Forum](#). Thank you.

<i>How Alternative HTML works</i>	75
Multiple websites	83
<i>Managing and editing multiple websites</i>	83
<i>How to create a new empty Domain file</i>	85
<i>How to split a Domain file into two or merge two Domain files into one</i>	85
<i>Publishing multiple websites to the same domain</i>	85
<i>Publishing multiple websites to different domains</i>	86
Having two iWebs	87
Cross-Browser compatibility issues	88
<i>Why is it happening?</i>	88
<i>What can be done to keep it from happening? Is there any solution?</i>	89
<i>Possible reasons and solutions for particular problems</i>	90
Faster loading websites	92
<i>Why are iWeb websites so slow?</i>	92
<i>How can I have them loading faster?</i>	92
<i>Which application can I use to optimize my website?</i>	92
<i>Other reasons for optimizing your website</i>	93
<i>I optimized, published to a fast server, have a fast internet connection but it's still slow?</i>	93
Section 2: Appearance	94
Build your own iWeb theme (kind of...)	95
<i>Sizes</i>	97
<i>The background</i>	97
<i>The menu</i>	97
<i>Graphical add-ons</i>	97
<i>Technical add-ons</i>	98
<i>Text-Content and content-formatting</i>	98
<i>Adding a new page to the site</i>	98
<i>Adding a new page with another template (Blog, Podcast, Album pages and Photos pages)</i>	98
<i>So...</i>	99
<i>Of course you can also buy additional themes and templates</i>	99
Columns	100
<i>Columns in HTML</i>	100
Tables	102
<i>Standard tables</i>	102

Sortable tables

104

Section 3: Navigation**105****Navigation menu FAQ****106***How can I have pages which do not display in the navigation menu?*

106

How can I have pages without navigation menu?

106

How can I add a link to an external page to the iWeb created navigation menu?

106

How to create your own navigation menu (change the font, the size, colors, ...)

107

How can I have a menu in an iFrame like the iWebFAQ.org menu displaying on the right side of every page on the website?

107

Two ways to organize your website if it has a lot of entries in different categories/upper level groups

112

How to change the color of the links on a Blog summary page and the font of the excerpts

112

Drop down menus in iWeb**113***Troubleshoot*

117

How to have multiple menus on a site

117

*How to customize the appearance of the drop down menu (Basics) **

117

Tear down menus in iWeb**120****Sliding image menu *****124****Accordion menu *****130****Image map****135****Rollover buttons or images****140****Floating menu (or float anything else) *****141****Redirect****145***Instant redirect*

145

Redirect with time delay

145

Anchors ***146***What is an Anchor?*

146

How to add Anchors to iWeb

146

Linking to a specific part of a page from another page

150

Section 4: Text and other content**151****Wrap text around objects****152***Wrap text around HTML Snippets and more*

152

Wrap text in HTML

152

iFrame and "Frames" (Boxes with scrollbars)**154***iFrame*

154

[Go back to the Index](#)<http://iwebfaq.org> is made by Cédric and hosted by [HostExcellence](#) //////////////// For questions and feedback about this E-Book please refer to my [Forum](#). Thank you.*iFrame a particular part of a page*

155

Making the iFrame clickable

155

"Frames"

156

How to have a TextBox with vertical scrollbars without using an iFrame (also works with images, videos and any other code)

158

Auto-Scrolling text and images ***160****Auto-Fading text *****161****Featured content slider *****164****Different tabs with slide effect *****167***How do I add more tabs or reduce the number of tabs?*

168

Mixed contents slideshow ***170****Toggle, Hide and Display****172***Simple Hide/Display*

172

Multiple Hide/Display displaying only one at a time

173

Further notes

175

Pop up windows**176***Creating the page which will display in the popup window*

176

Code to open the popup window

176

Calendars**180***Using iCal with PHP iCalendar*

180

*Using Google calendar **

180

*Using iCal with iCloud with Google calendar **

182

*Using iCal with Dropbox with Google calendar **

183

Google Maps**184***iWeb widget*

184

Further customizable way

185

Database**187****Section 5: Photos and images****188****Photos FAQ****189***Protecting your photos*

189

How My Albums pages work

191

How to have My Albums pages in My Albums pages instead of having Photos pages in them

191

I want to use iWeb's Photos page but I don't want to have the first page displaying all the thumbnails. I just want the one with the large photo and the row of small thumbnail images along the top.

192

Highslide JS (visual Highslide Editor)**193**[Go back to the Index](#)<http://iwebfaq.org> is made by Cédric and hosted by [HostExcellence](#) //////////////// For questions and feedback about this E-Book please refer to my [Forum](#). Thank you.

A general way (working for all Highslide effects) *	193
Shadowbox	199
SimpleViewer galleries	204
Auto-Fading photos slideshow *	205
Having the photos changing manually	207
How do I prevent the slideshow from stopping on mouseover?	209
Zoomify	210
